

# Planet-Based Diets

## Graphical Data for Switzerland

Geography:	Switzerland	Diet:	None	Total or Per Capita:	Per Capita
Indicator:	Food intake	Reports an NDG?:	Yes		

Per Capita Environmental and Health Impacts of Food Consumption (includes imported food)

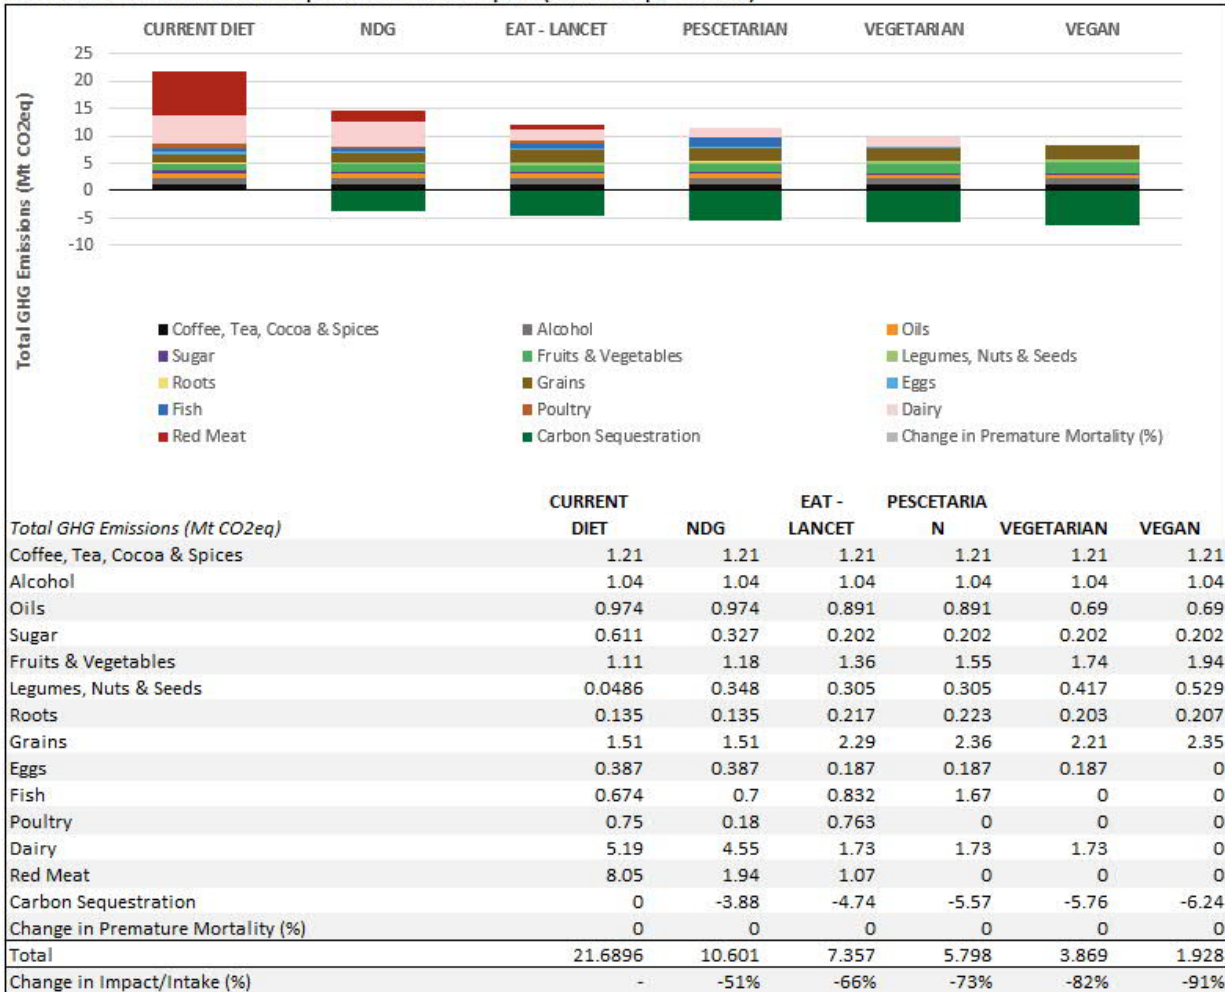

**Notes:** Values rounded to 3 significant figures; if a country does not report a Dietary Guideline, the NDG intake equals intake under the current diet; positive carbon sequestration occurs in some countries and some scenarios and means positive emissions from deforestation.

Geography:	Switzerland	Total or Per Capita:	Total
Indicator:	GHG Emissions	Reports an NDG?:	Yes

**Total Environmental and Health Impacts of Food Consumption (includes imported food)**

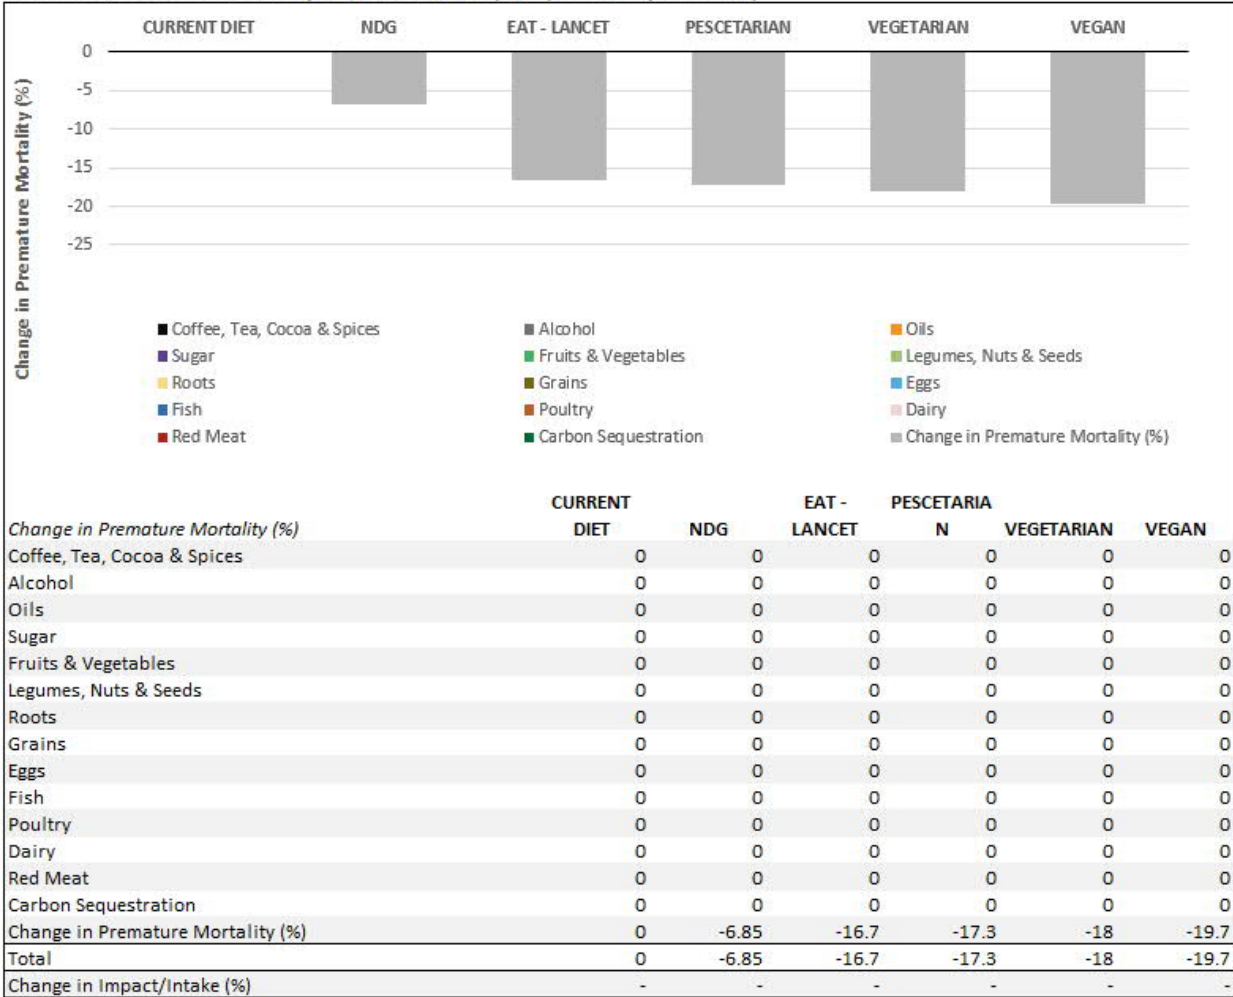

**Notes:** Values rounded to 3 significant figures; if a country does not report a Dietary Guideline, the NDG intake equals intake under the current diet; positive carbon sequestration occurs in some countries and some scenarios and means positive emissions from deforestation.

Geography:	Switzerland	Total or Per Capita:	Total
Indicator:	Mortality	Reports an NDG?:	Yes

**Total Environmental and Health Impacts of Food Consumption (includes imported food)**

**Notes:** Values rounded to 3 significant figures; if a country does not report a Dietary Guideline, the NDG intake equals intake under the current diet; positive carbon sequestration occurs in some countries and some scenarios and means positive emissions from deforestation.
